Warehouse Expansion of IMN GmbH in Düsseldorf

The Hamburg-based IMN International Mail Net GmbH (International Mail Logistics) has expanded its operational area at the Düsseldorf site to 1,800 sqm.

By the end of 2016 IMN had shared the logistics center with another tenant.

"We are very pleased to be able to use the entire hall for our customers and to make the rapidly growing areas of return management and fulfillment more efficient," says Sven Schwöpe, Managing Director

At the Düsseldorf location, several hundred pallets are available. The IMN logistics center is located in the Reisholz district of Düsseldorf and can be reached via the A 46 and A 59 in a very convenient way.

„The expansion of the location in Düsseldorf takes account of the booming international e-commerce sector. E-tailers and web shops attach great importance to efficient and cost-optimized returns processing. We are now well placed with the larger area," says Schwöpe.

IMN offers your international e-commerce customers worldwide solutions for their package dispatch, as well as fulfillment and return management.
